**SCIENCE LAB** At the end of this month the West Virginia Farm Bureau's Mobile Agriculture Education Science Lab will be visiting CBA for the week. The lab is scheduled to be at CBA January 29<sup>th</sup> through February 2<sup>nd</sup>. Students in grades kindergarten through 6<sup>th</sup> grade will attend the science lab. The 46-foot Lab is a fully self-contained unit equipped with multiple research stations. A retired or certified teacher guides students while they conduct hands-on experiments or activities. Students learn about the importance of agriculture in everyday living. They will do experiments, learn to read nutrition labels, discover which snacks are healthier for their bodies, and what food choices will promote healthy lifestyles. Some of the experiments include making "Glue from Milk" and comparing it to commercial glue; understanding the concept of environmental impact by making "Plastic from Corn" instead of from petroleum; and seeing if they can extract DNA from a strawberry and why a farmer would want to do that.

## CBA'S TEN CATECHISMS

**Question 6:** How can we be saved?

**Answer:** We are saved only by grace through faith alone in Jesus Christ. Jesus died on the cross for our sins, was buried, and rose again on the third day to claim victory over sin and the grave. Repentance and belief in the Gospel of Jesus Christ is the only hope for our salvation. (Eph. 2:8-9; 1 Cor. 15:3-4, 54-57)
